

Department of Geography and Environmental Engineering
Approved Graduate Schools

As Of: April 2004

NOTE: The cost guidelines are updated as of April 2004, but the actual school cost categories are not current

The following is an alphabetical list of the recommended schools provided to you for guidance in selecting a graduate program. The Group Director has the final say in which school you attend (based upon allocation of low/mid/high tuition authorizations for that given year).

Each school is identified with an associated cost category. You are required to apply to at least one low cost school. This may be determined, in some cases, if you qualify for the in-state tuition rate (low cost). In all cases, check with the school to see if you meet the in-state tuition requirement based upon “attending while serving on active duty” clause. The below link provides more information located on the HRC homepage.

Note:

\$ = low-cost school (annual tuition < \$10000)

\$\$ = mid-cost school (annual tuition < \$16,000 – but >\$10,000)

\$\$\$ = high-cost school (annual tuition > \$16,000)
