Problem 13

A topology problem.

You may stretch or shrink the loops (or any segment of the object below), but you can not disconnect any part of the object. You may not combine two loops together to make them one loop, shrink a loop to get rid of it, or create a new loop by combining two ends. How can we transform the object on the left to the object on the right? Illustrate by sketching your transformation.

Submission Instructions

Submit to : [MAJ Jong H. Chung](#)

How : As an attachment to an
email(please make sure your
name is in the attachment!)

With the subject line : WP POTW

Failure to follow these directions may result in your submission not
making into the pile in the right order!
