Section A, C, D 10

MA 104, Homework #1 & Block I AAR

Due: 14 February 08

---

**Instructions:**

- Use complete sentences whenever you are explaining your work.
- Include a typed cover sheet and documentation (if necessary).
- Include WPR 1 as part of your submission. Place it after HW1, but before the documentation.
- Fasten all documents together (brown bomber or staple).

---

**WPR 1** For each question (or part of question 1) that you missed points on do the following:

1. State the problem.
2. Give the correct solution.
3. State the lesson objective(s) being addressed in that problem.
4. Find two different questions that address the same lesson objective(s) as the exam problem. They may be questions from class, the text or your brain. Do not give the exam question as an example or a problem that looks like the exam question with different numbers. Most lesson objectives can be asked in different ways, try to find different ways to ask the objective.
5. Give the solutions to the two questions.

---

**TEE** We are given inside information that the TEE will have 1 question from Block I.\* Use your knowledge of the Block to create this question (and answer).

1. Write a unique problem for Block I that addresses at least one block objective. Note, a TEE question will not be a question we have seen in class, on a WPR or in the textbook; it should be truly unique.
2. Type up your question. Microsoft Word Equation Editor will make it look nice.
3. Provide an answer key, which may be handwritten.

---

\* No such intelligence truly exists.
