

Information Assurance

Dr. Stanley R. Niles
U.S. Army Research Laboratory
Adelphi, MD

Cadet Sean Storey
United States Military Academy
West Point, New York

ABSTRACT:

The purpose of my Advanced Individual Academic Development (AIAD) was to gain more knowledge of the Army Research Lab (ARL) as an Army enterprise system, specifically the Information Assurance Management Office (IAM). I worked on a variety of different Admin tasks to include writing policy, creating training and forms. I also visited several different ARL offices such as Adelphi Laboratory Center (ALC) and Aberdeen Proving Ground (APG) to get a better understanding of how Information Assurance (IA) works in the army.
