

Systems and Network Analysis Center (SNAC) Research Opportunities

Calvert L. Bowen, III
National Security Agency

ABSTRACT:

The Systems and Network Analysis Center (SNAC) conducts ongoing analysis of a wide variety of commercial and government systems in order to protect US Government information. This presentation includes an overview of the SNAC's organization and mission lines as well as several research opportunities in support of the SNAC's mission during the next 12 to 18 months. Most of the projects can be considered for short term internships. Longer term projects and graduate level research topics are also presented.
